

# Ascend

---

Ascend mimics the feel and playability of real grass like no other system in its class. No compromise here. We utilize a three-piece fiber composition wherein monofilament, thatch and slit film join forces in each individual stitch to ensure an optimally safe, responsive surface tuned for high-intensity applications. Our team of designers collaborates with each user to identify a sub-base solution that will maximize athlete performance and safety.

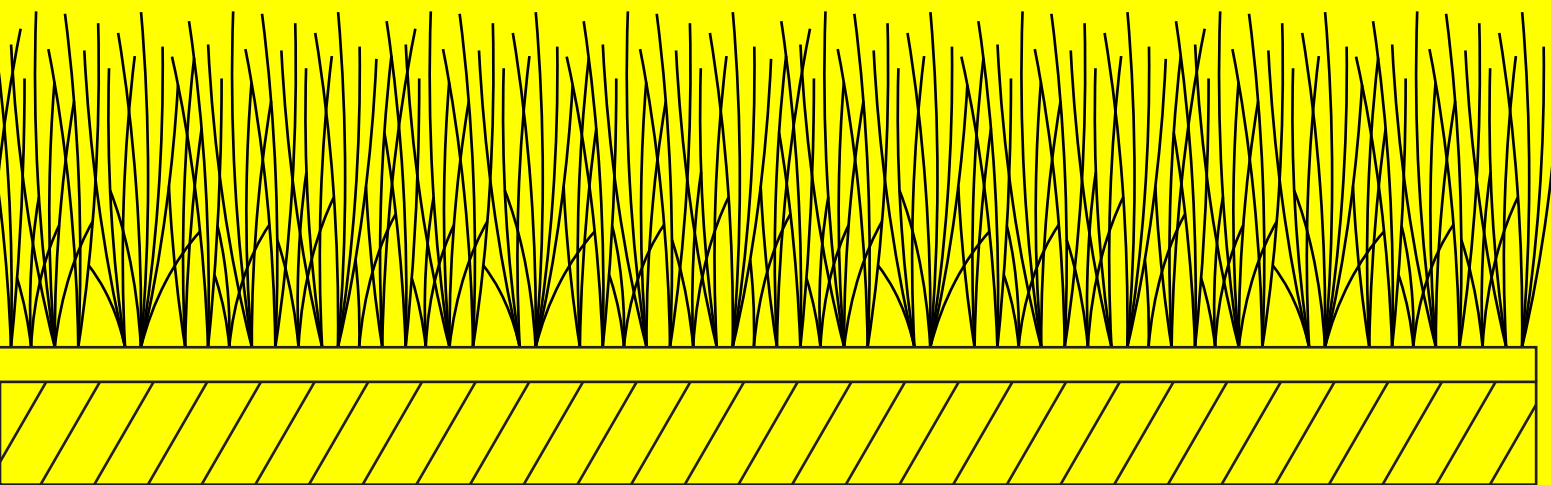

For those who refuse to accept second best, we offer Ascend, a dynamic solution that provides durability, unmatched realism, and unbeatable performance.

**CLOSER TO THE REAL THING**

# Ascend

Please consult sales associate for color options.

Ascend boasts a highly durable three-piece fiber composition, 1.5in or 2in tall, chosen for its dynamic resilience and unparalleled lifespan. Unique weave technology allows monofilament, thatch and slit film to join forces in each individual stitch. We work to match a custom infill solution to each application, ensuring performance characteristics that closely mimic the real thing.

We collaborate with all of our users to identify dynamic, optimal sub-bases suited to each unique application.

## Materials

Monofilament, thatch and slit film woven into a polyurethane backing

## Pile Height

1.5in, 2in

## Roll Length

Custom

## Face Weight Per Area

60, 70 oz/sq. yard

## Roll Width

15'

**\*Suitable for applications involving cleats, as well as regular shoes**
