

Maintenance | Crossgrind

STEPS

Initial Maintenance

Cleaning Products	Diversy Profi
Dilute oz/gal	10oz
Equipment	Micro-fiber mop or 3M Red Buffer Pad 5100

Regular Maintenance

Cleaning Products	Diversy Profi
Dilute oz/gal	2-4oz
Equipment	Micro-fiber mop or 3M Red Buffer Pad 5100

Heavy Soil & Restorative Cleaning

Cleaning Products	Diversy Profi
Dilute oz/gal	16oz
Equipment	Micro-fiber mop or 3M Red Buffer Pad 5300

INITIAL MAINTENANCE

1. Remove all surface dirt and debris by vacuuming sweeping, damp microfiber mop (Rubbermaid Reveal Spray Mop). Commercial grade electric floor scrubber/extractor equipment is recommended for large or high-traffic areas. Use the softest bristle attachment or red buffer pads with minimum pressure.
2. Scrub the area using approved cleaning solution (10oz/gal of water), micro-fiber mop (or buffer pad). Avoid flooding the flooring. This is very important as flooding or excess water can lead to moisture between seams, which may result in splitting seams. A mist spray should be used to project cleaning solution.
3. Pick up solution with a wet vacuum.
4. Repeat rinsing until water removed is clean.
5. Allow to dry before use (6-8hrs).

REGULAR MAINTENANCE

1. Remove all surface dirt and debris by vacuuming, sweeping, damp microfiber mop (Rubbermaid Reveal Spray Mop). Commercial grade electric floor scrubber/extractor equipment is recommended for large or high-traffic areas. Use the softest bristle attachment or red buffer pads with minimum pressure.
2. Scrub the area using approved Diversy Profi (2-4oz/gal of water), micro-fiber mop (or buffer pad). Avoid flooding the flooring. This is very important as flooding or excess water can lead to moisture between seams, which may result in splitting seams. A mist spray should be used to project cleaning solution.
3. Pick up solution with wet vacuum (if necessary).

HEAVY SOIL & RESTORATIVE CLEANING

1. Heavy scrub using approved cleaning solution (16oz/gal of water). This cleaning may be performed with an auto scrubber and approved pad (3M Blue Cleaner Pad 5300).
2. Vacuum soiled solution with a wet/dry vacuum.
3. Rinse with clean water.
4. Allow floor to dry thoroughly (6-8hrs).
