

Maintenance | **Score**

INITIAL CLEANING (AFTER INSTALLATION) AND DEEP CLEANING:

DAILY/MONTHLY MAINTENANCE

Remove dust, grit, and abrasive particles by sweeping Score surface with dust mop and approved urethane finish cleaner. Please refer to specific cleaner's instructions for appropriate application rates and mixture concentrations.

ANNUAL MAINTENANCE

PLAE recommends that Score be re-coated with a new finish at least once a year.

PRECAUTIONARY NOTES

- Stains may be avoided by wiping spills immediately
- Wipe water spills immediately.
- If spills are absorbed into the finish, staining can be removed by freezing and scraping it off.
- Excessive tightening can be reduced by lowering relative humidity and increasing airflow in the room.
- Excessive cracks can be alleviated by increasing the relative humidity in the room.
- Expansion joints around the edges or inserts of the Score floor should be given room to expand and not blocked.

DISINFECTANT CLEANING

AS OF MARCH 10, 2020: We recommend RMC Enviro Care Neutral Disinfectant for disinfecting viruses, bacteria & fungi to include Coronavirus (COVID-19), HIV-1, and Hepatitis-B.

For an extensive list of all viruses, fungi & bacteria that Enviro Care is effective against, please visit: <https://www.rochestermidland.com/>
